03 How to Document the Layout & Photos

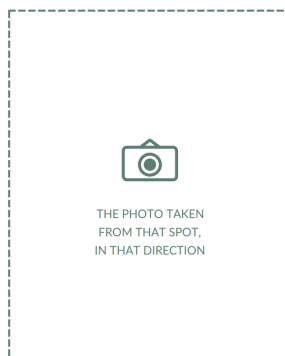

One photo. One arrow. One copy of the layout. That is the whole method — repeated as many times as you took photos in that room.

1. MARK WHERE YOU STOOD

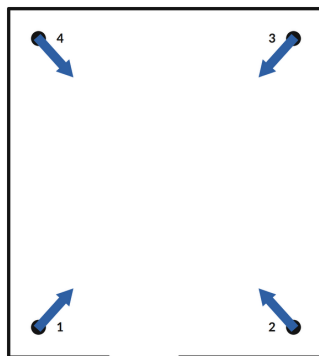

One dot. One arrow, pointing the way the camera faced.

2. PASTE THAT PHOTO NEXT TO IT

=

SAME ROOM, FOUR PHOTOS

Four photos taken in this room means four separate layout-and-photo pairs on the sheet — not one shared layout.

HOW TO FILL PART 2, STEP BY STEP

1. For every photo you take in a room, use one row on that room's sheet.
2. Paste or insert a copy of the room's layout into the left box of that row.
3. On that layout, mark one dot where you were standing, and draw one arrow from the dot showing exactly which way the camera was pointed.
4. Paste the matching photo into the right box of the same row.
5. Move to the next row for your next photo. Do not put more than one arrow on a single layout copy — a layout with two arrows does not say which photo is which.

03.1 What to Make Sure You Capture, Room by Room

ROOM	MAKE SURE ONE PHOTO EACH COVERS
Living & Dining	Every wall, the ceiling, the floor, and each window and door.
Bedrooms	Every wall, the ceiling, the floor, and the window.
Kitchen	Every wall, plus a close-up of every existing plumbing point and every existing electrical point.
Bathroom	Every wall, plus a close-up of the floor drain and the ventilation point.
Balcony	Every wall, the railing, the floor drain, and the view looking out.

A close-up of a plumbing or electrical point still gets its own row — mark where you stood and which way you pointed the camera, exactly like any other shot.

04 Layout & Photo Sheets

One block per room. Each row is one photo and its matching layout arrow. Duplicate a row for extra photos; leave rows blank if you needed fewer.

Living & Dining

A larger room — plan for six to ten photos.

SHOT 1 — PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 1 paste matching photo
SHOT 2 — PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 2 paste matching photo
SHOT 3 — PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 3 paste matching photo

SHOT 4 – PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 4 paste matching photo
SHOT 5 – PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 5 paste matching photo
SHOT 6 – PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 6 paste matching photo

Took more photos than rows here? Duplicate a row. Took fewer? Leave the rest blank.

Master Bedroom

Four to six photos is typical.

SHOT 1 – PASTE ROOM LAYOUT HERE Mark ONE dot where you stood, and ONE arrow showing the exact direction the camera faced.	PHOTO 1 paste matching photo
